PROJECTS

Dental Care | [Live Site](#) [Client Side](#) [Server Side](#)

Service Review Website, Nov 2022

Used technologies - Tailwind CSS, ReactJS, NodeJS, Express, toast, JWT and firebase authentication.

- Users can log in with email and password and use their existing GitHub account.
- Users who are logged in have the ability to add services and offer reviews. When a user logs in, they'll immediately be able to access the newly available service.
- On the home page, only three services are available. When a user clicks on the see all button, he/she will be able to see all the services.

Bookstore | [Live Site](#) [Client Side](#) [Server Side](#)

Website for Reselling products, Dec 2022

Used technologies - Tailwind CSS, ReactJS, NodeJS, Express, toast, JWT, firebase authentication, Stripe.

- An individual user has the option to register themselves as either a buyer or a seller.
- A verified seller who is also an admin has the ability to add things to be sold, as well as delete any product.
- Admin can see all the buyers and sellers and has the ability to remove any buyer or seller and verify the seller.
- Any user who has logged in using their Google account will automatically be considered a buyer. Buyers can pay for buying a book.

CSE Basic | [Live Site](#) [Client Side](#) [Server Side](#)
